

NTUAS Study

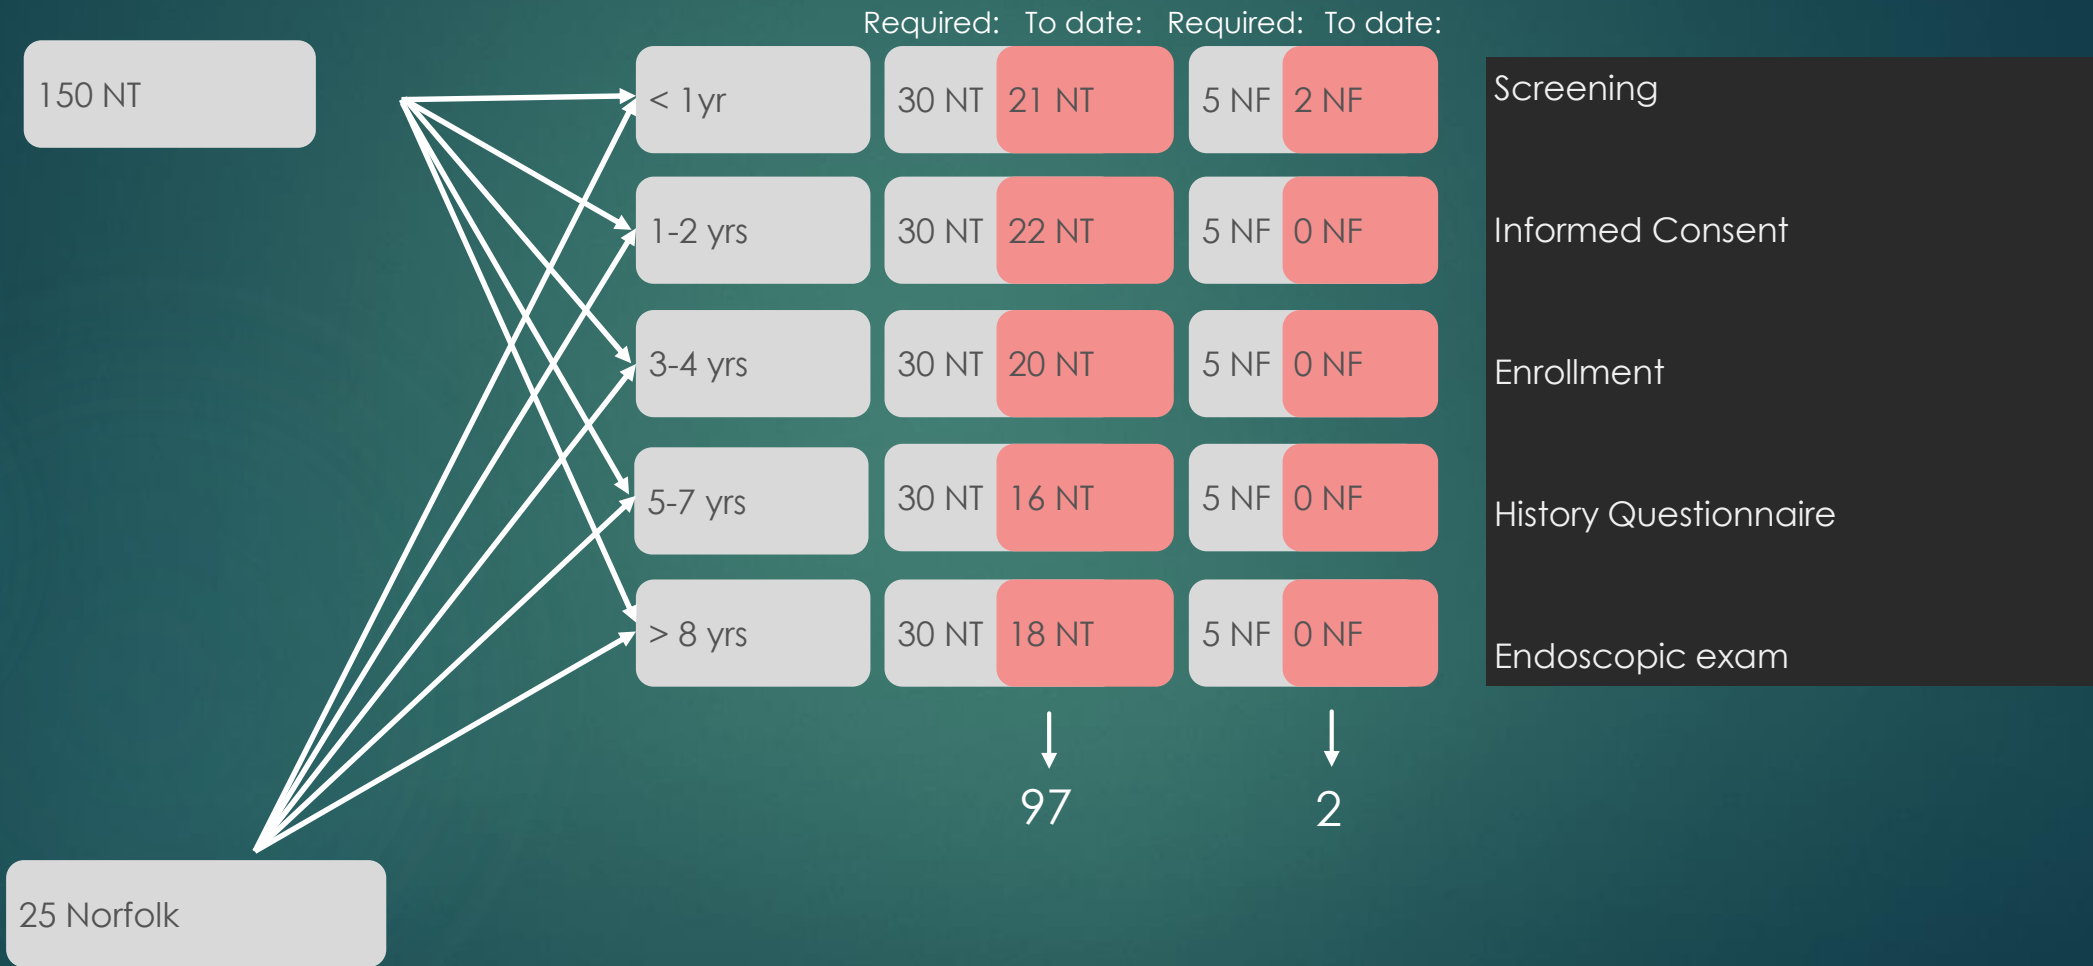

PROGRESS REPORT- JAN. 2017

GRACE P. LAI

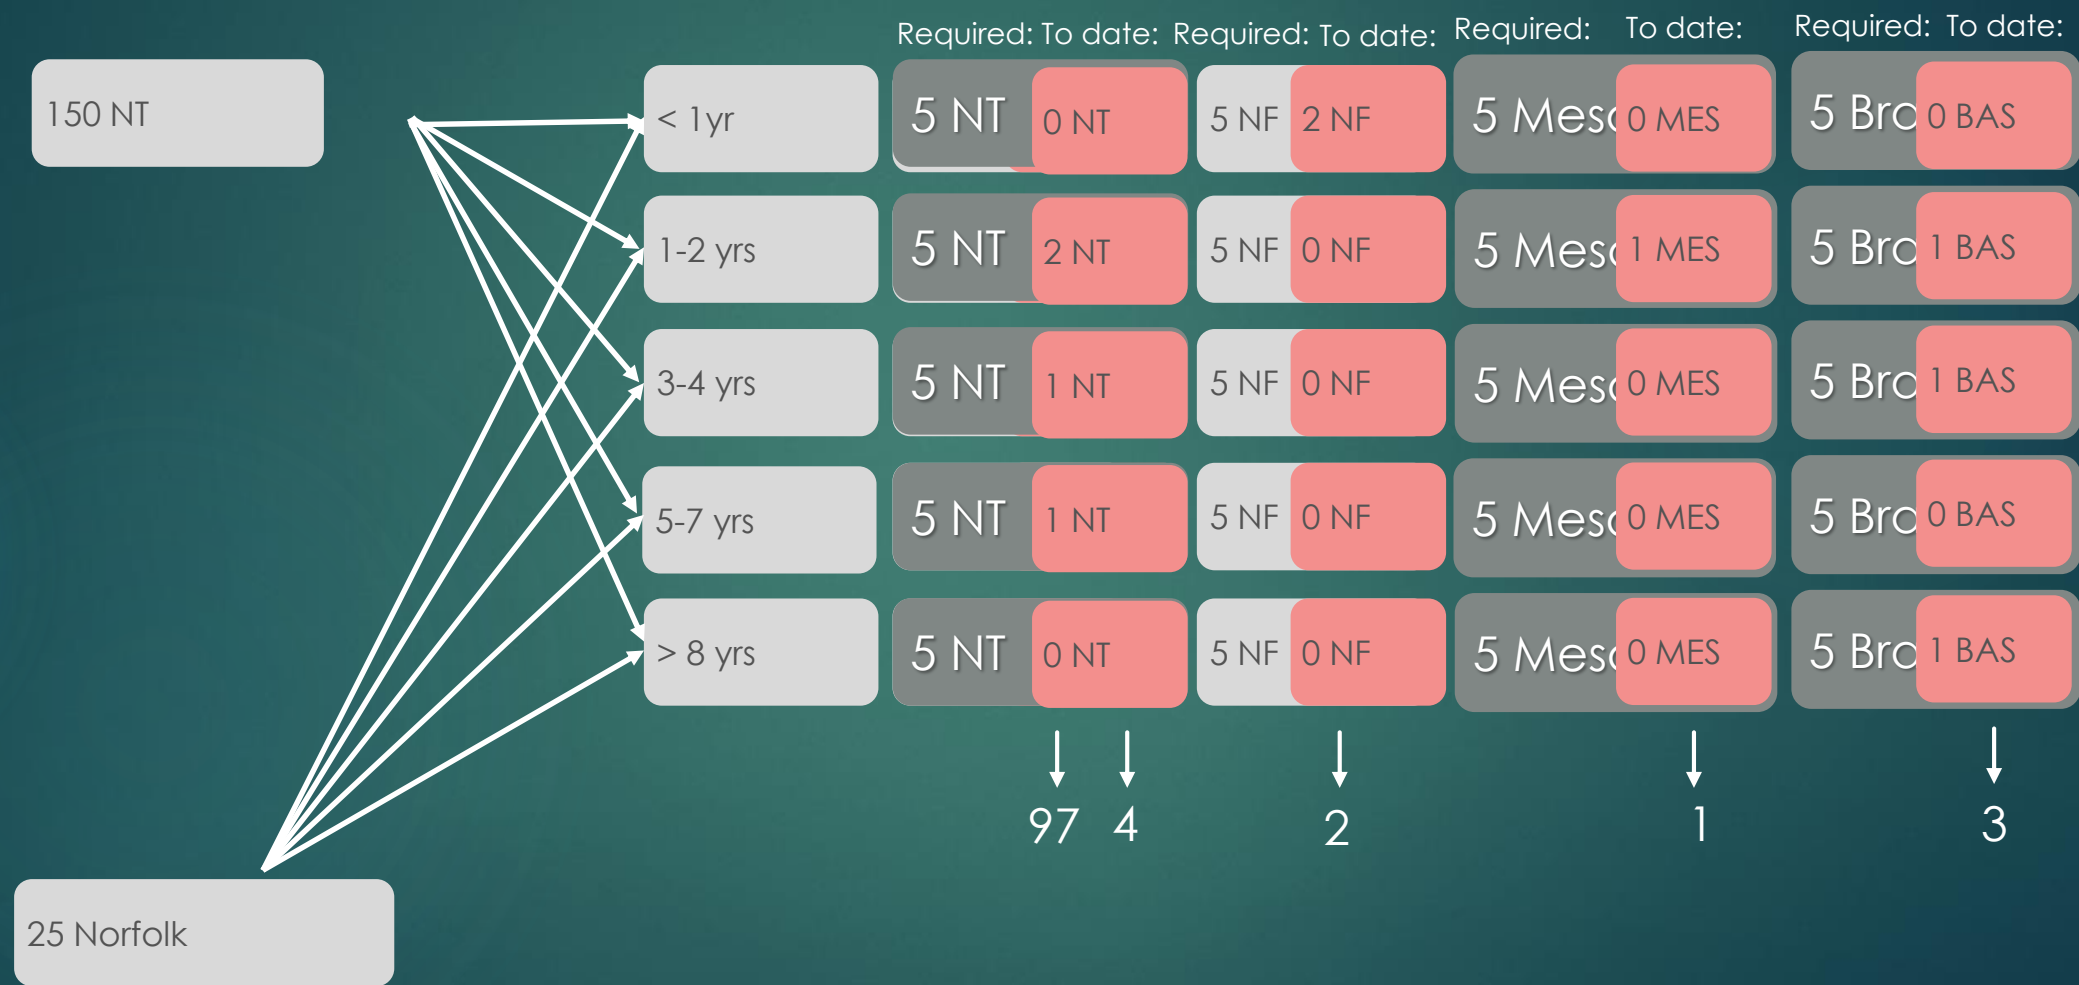

Objective 1:

Document and describe the clinical presentation and detailed upper airway endoscopy in Norwich terriers

Objective 2:
Rhinomanometry, head and neck CT, and upper airway endoscopy
will be compared between NT/NF/MES/BAS

Plan to move forward:

► Objective 1:

1. Search REDCap for declined recruited dogs to get more NTs
2. Talk to Norfolk Terrier Club

► Objective 2:

1. Fill in mesaticephalic – easier
2. Do more than one dog per Study day- pneumotach machine permitting

Objective 3:

Describe the pathology seen in tissue collected from affected dogs and compare to tissues from control groups

	NT	BAS
Total submitted samples	36	5
Final reports	22	4
Pending reports	14	1

Objective 4:

Collect pedigree information and blood for DNA extraction

- ▶ Received partial documents from institutional investigators. Still coming. Intermittently.

Timetable:

Year 1:

2015-16	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	
REDCap build													BJS
Recruitment													All PIs
Enrollment													All PIs

Year 2:

2016-17	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	
Recruitment													
Enrollment													All PIs
Analysis													BJS,NN
Publication													All PIs & Co-Is

Are we happy? Any adjustments needed?

MSU students love Norwiches, too!
